

Protect your employees & customers with **FIRST LINE** Facial Recognition.

DETER, DETECT, DELAY, DENY, AND DEFEND.

Through use of **FIRST LINE** Facial Recognition's "unknown" capture capabilities, late-night businesses are able to achieve a significant added layer of security. The system can be synced with door locks at multiple entrances. If someone approaches, they will need to have their face visible and register as "unknown" for the door to open and the subject to be granted entry.

90% of robberies occur with masked assailant:

Our Unique Solution:

Crime within Denver's 325 dispensary companies has risen 50% since 2009 -
Marijuana Business Daily

ALIGNS SECURITY OBJECTIVES

Easy to Use Interface allows user to add, store, and edit data both directly on the unit and through a seamless web interface.

Prevention and Immediate Detection of both external and internal threats

Access Control for any secured areas in which greater control is desired

Concierge Service capabilities offer greeting and rewards programs for specific customers

BENEFITS

- Deters all crime, especially violent crime
- Masked assailants will not be able to enter
- Captures subject's face on the move
- Increased safety of employees and other patrons
- Creates a virtual "security guard" on every door
- Establishments can share databases of known assailants
- Blue Line Technology can interface with existing security infrastructure
- Fast, accurate, and highly reliable state-of-the-art biometric solution
- Retain night time employees and ease their anxiety while in the workplace
- Customers feel safer because of the deployment of cutting-edge security

Internal Access Control and Threat Detection

They can steal your card, but not your face...

True Two Factor Authentication Application on key access points

90% of theft is internal

FEATURES

Face Identification: can be separated into three distinct categories: known, unknown and alert.

True Two Factor Authentication - eliminate FOB/Card security vulnerabilities with dual authentication

Notification: on-site monitoring, emails, text messaging including camera location, name, notes, and photos of the alert.

Monitor Alerts: allow for playback video feature and detailed person information with a single click.

Prevention and immediate Detection of both external and internal threats

Functionality: Works with existing access control and maglock/door strike manufactures.

Enhanced Camera Features: Axis Communications Forensic Capture and Lightfinder handle complex lighting conditions.

FIRST LINE Facial Recognition's users create a database for their specific needs for employee access and accountability. **FIRST LINE** will monitor, detect and validate employees, contractors, visitor who are paired with card/FOB readers for access control management.

FIRST LINE's non-intrusive secondary biometric solution not only upgrades your current access control management, but simultaneously adds capabilities of deterrence, threat detection and alert capabilities. With high turnover rates of part-time staff and access to easy cash and marijuana will increase temptation for theft.

Marijuana Business Daily reports that potential ballot measures loom in another six states, and predicts that legal pot could become an \$8-billion industry in the U.S. by 2018. But marijuana use remains illegal under federal law, causing most banks to steer clear of the industry. As a result, most dispensaries must deal in cash. - Los Angeles Times 2017

FIRST LINE Facial Recognition was developed by a team of law enforcement professionals with more than 120 years of experience in both theft prevention and violent crime reduction strategies.

A solution that serves the community, the employees and the customer.
